

Ajouter un compte Hotmail sur un I Phone 4

Par Tera-Solutions Inc.

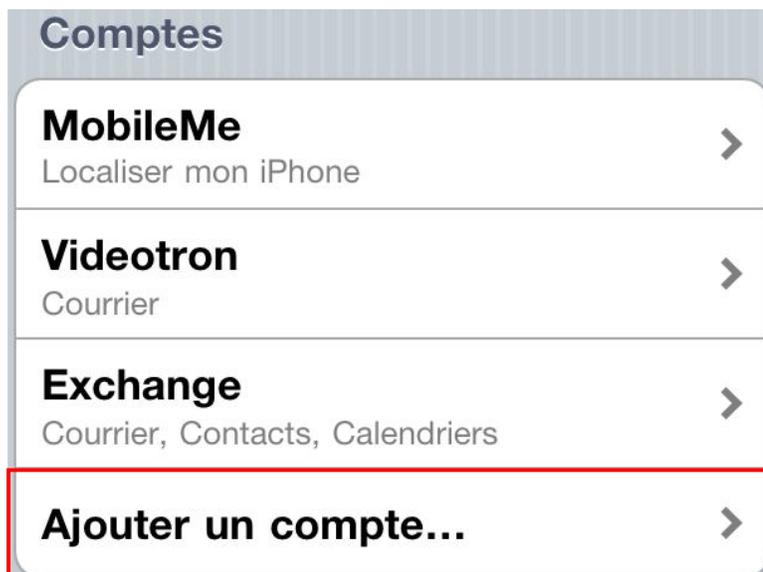

1. Cliquez sur l'icône **Réglages**

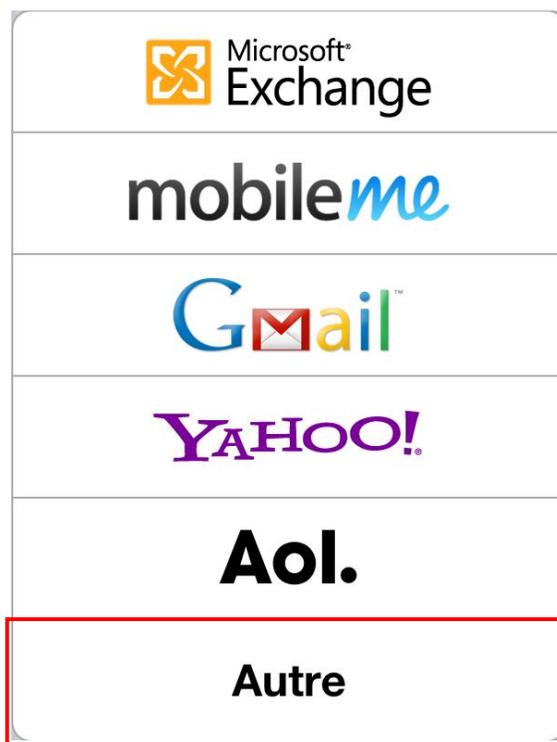

2. Cliquez sur l'icône **Mail, Contacts, Calendrier**

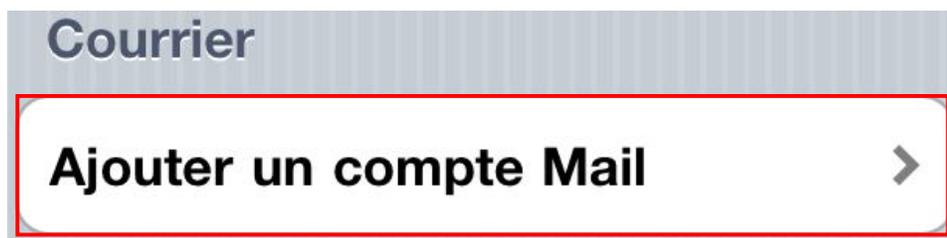

3. Cliquez sur **Ajouter un compte...**

4. Cliquez sur **Autre**

5. Cliquez sur **Ajouter un compte Mail**

6. Entrer votre nom, adresse Hotmail, mot de passe et cliquez sur **Suivant**

A screenshot of a mobile application interface for creating a new email account. The title "Nouveau" is centered at the top in a grey header. On the left is a blue "Annuler" button, and on the right is a blue "Suivant" button, which is highlighted with a red rectangular border. Below the header is a form with four rows, each with a label and a text input field. The first row is "Nom" with the value "Gilles Allain". The second row is "Adresse" with the value "exemple@me.com". The third row is "Mot de passe" with the value "Requis". The fourth row is "Description" with the value "Mon compte courrier". The entire form area is highlighted with a red rectangular border.

7. Si un crochet apparait à droite de chaque case, votre compte est bien configuré. Vous pouvez fermer et prendre vos courriels.
